

Example- Audio Book Voice-Over Rates (USD)

Audio book voice-over rates for non-union voice actors typically range from \$150 to \$350 per finished hour (PFH) of audio. You can determine the estimated hours of finished audio by word count.

Here's an audio book voice-over rate formula as an example:

\$150 (USD) PER FINISHED HOUR

Total Word Count / 150 = Finished Minutes

Finished Minutes / 60 = Finished Hours

Finished Hours x \$150 = Audio Book Quote

To help, here's an example voice-over rate for an audiobook:

Audio book voice-over rate example:

65,000 word audio book script

65,000 words / 150 = 433 finished minutes of voice-over

433 finished minutes / 60 = 7.2 finished hours of voice-over

7.2 finished hours x \$150 = \$1,080

In this example, the voice-over rate for this project would be \$1,080 (USD) or \$1,693 (AUD) or 890 (GBP).
